Prison Management Information System (PMIS)

Overview

PMIS is a comprehensive, end-to-end digital solution designed to automate and manage every aspect of the prison ecosystem—from prisoner admission to discharge and aftercare services. Integrated with biometric and HRMIS systems, it ensures high security, transparency, efficiency, and centralized governance across all prison stations.

Key Modules

- **Admission & Biometric:** Capture complete prisoner details, recidivism detection, unique prisoner ID, admission of special cases (mothers, children, escapees).
- **Court & Sentence Management:** Automated sentence calculation, court production schedules, appeals tracking, bail, remissions, and warrant generation.
- **Medical & Property Management:** Medical history, screenings, malnutrition, treatment records, and complete prisoner property tracking (in/out/destroyed).
- **Discipline & Rehabilitation:** Disciplinary tracking, punishment logs, grievance redressal, skill development, education, counseling, aftercare.
- **Gate & Transfer Management:** Biometric gate pass, escort team management, prisoner movement logs, transfer protocols, escape tracking.
- **Earnings & Gratuity:** Daily attendance, earnings deposit/withdrawal, pay slips (PF86), 2/3 earnings auto-transfer, savings account.
- **Station Operations:** Staff deployment, logbooks, food reports, visitor & call management, congestion analysis, physical vs. system lockup reconciliation.
- **Reports & Dashboards:** Real-time dashboards, alerts (escape, death, medical), demographic stats, admission/discharge logs, legal tracking, medical and earning reports.
- **System Admin:** Role-based access control, backups, audit trails, master data management, configuration tools.

Core Benefits

- ✅ Centralized & secure data management
- ✅ Multi-level workflow automation
- ✅ Real-time lockup and station insights
- ✅ Alerts & notifications for critical events
- ✅ User-specific dashboards & MIS reports
- ✅ Scalable for national-level deployment

Advanced Features

- Visitor Management System (VMS)
- AI-Powered Surveillance & Monitoring
- Face Recognition System
- Food & Nutrition Inventory Management
- Geofencing Prisoner Tracking
- AI Chatbot for Prison Staff & Families
